Education

2023-2026
Kamla Nehru Mahavidhyalaya
Bachelor Of Vocation (Software Development)

2021 - 2023
Mathuradas Mohota College Of Science
Higher Secondary Certificate (HSC)

Technical Skills

Backend: Node.js, Express.js
Database: MySQL, Stored Procedures
API Development: REST APIs, JWT
Authentication, Role-based Access
Tools: Git, Postman, VS Code ,
Firebase (FCM Notifications)
Frontend (Basic): React.js
Other: MVC Architecture,
Error Handling, API Security

Language

- English
- Hindi
- Marathi

About Me

Backend-focused MERN Stack Developer with hands-on experience building scalable APIs, database-driven systems, and real-time applications. Strong expertise in Node.js, Express, and MySQL with business logic handled through stored procedures. Proven ability to design efficient backend architectures, optimize performance, and collaborate in team environments.

Experience

MERN Stack Developer Intern
SKYVISION IT Solutions Private Limited
13th January 2026 – Present

Developed and maintained backend APIs using Node.js and Express

Designed database architecture using MySQL with Stored procedures for business logic

Implemented secure authentication using JWT
Built scalable REST APIs for multiple modules (users, bookings, notifications)

Integrated Firebase Cloud Messaging (FCM) for real-time notifications

Collaborated with frontend team for seamless API integration

Optimized database queries improving performance and response time

Projects

Attendance System
Built backend APIs for attendance management and tracking
Implemented validation logic and optimized database queries using Stored Procedures
Designed scalable architecture using Node.js and MySQL
Link Of Project : - [Sky_Attendance](#)

Transload System
Developed backend for logistics/transload operations
Designed REST APIs for data handling and tracking
Optimized performance for handling large datasets
Link Of Project : - [Sky_Transload](#)
